

RETIREMENT LECTURE

Some non-metallic and metallic mineral products: Occurrence, properties, applications and marketing

Cheang Kok Keong (formerly Universiti Sains Malaysia)

16 December 2015, Department of Geology, University of Malaya

Retirement Lecture No. 5 entitled “Some non-metallic and metallic mineral products: Occurrence, properties, applications and marketing”, was delivered by Sdr Dr. Cheang Kok Keong (ex-USM) on 16th December, 2015 at the Department of Geology, University Malaya, Kuala Lumpur.

Sdr Cheang discussed various metallic (eg. gold) and industrial minerals such as rock products, kaolin, etc., covering various material properties (physical, optical and chemical) and applications of the products. It was obvious from his presentation that Sdr Cheang has wide experience and expertise in the subject, having worked for many years in the industry as well as doing research in the university. We hope that Dr Cheang’s expertise can be tapped further post retirement, and wish him many happy and fruitful retirement years ahead.

The Society records with thanks Sdr Cheang’s contribution to the Society’s activities.

Tan Boon Kong,

Chairman, Working Group on Engineering Geology, Hydrogeology & Environmental Geology
