

## HGS Emerging Technologies Luncheon Meeting, April 24, 1996

*Join us for stimulating content in a unique format! Seven poster sessions will be set up in the dining room. During the social hour, you will have the opportunity to sample the posters. Then, during lunch, you can eat with the presenter(s) of the topic that intrigues you the most.*

### ***High-Resolution, Deep-Penetration Seismic: An Emerging Technology Becomes Established***

By William D. Adams, Mark G. Thomas, Reservoir Definition, Inc.  
and Mike A. Barth, Hummingbird Exploration

Seismic sections from high-resolution processing and acquisition will be shown from around the world. Frequency content higher than 100 Hz. can now be obtained through more than 3 seconds of sediment. Examples and comparisons with standard seismic will be presented from the Gulf of Mexico, offshore China, and offshore West Africa.
