

Selected activities of the Hydrogeology Program

G. W. Kennedy and J. Drage - *Nova Scotia Department of Natural Resources, Halifax, Nova Scotia B3J 2T9, Canada*
<kennedgw@gov.ns.ca>

Recent activities of the Nova Scotia Department of Natural Resources (DNR) Hydrogeology Program include the assessment of the relative vulnerability of coastal groundwater supplies to seawater intrusion and the identification of high potential areas for surficial aquifer groundwater supply development in unserved growth areas of the Halifax Regional Municipality. Hydrogeology program activities are also focused on the organization, compilation and mapping of provincial groundwater information and outreach initiatives, such as the Groundswell project.
