
The Occurrence of Thrusts in North Kedah and Perlis

ZAITON HARUN & BASIR JASIN

Program Geologi, Fakulti Sains dan Teknologi
Universiti Kebangsaan Malaysia, 43600 Bangi, Selangor, Malaysia

Several thrust faults were observed at Bukit Jabi, Bukit Kerangan, Bukit Tunjang and Kampung Binjai. The faults are high angle thrusts and dip towards the east. They exhibit more or less the same structural features. The faults displace the Lower Paleozoic Mahang and Setul Formations onto the Kubang Pasu Formation.
