

Conservation Geology: A Multidisciplinary Approach in Utilization of Earth Resources Without Destruction

IBRAHIM KOMOO

Institute for Environment and Development (LESTARI)
Universiti Kebangsaan Malaysia, 34600 Bangi, Selangor, Malaysia

The new field of conservation geology requires the input of the entire traditional fields of geology. A successful research and development programme for the advancement of this field requires expertise from other disciplines such as planning, law, tourism and management. Geologists should lead the development efforts and multidisciplinary networking in order to ensure that geology contributes to the aspirations of sustainable development.
