

<p><b>Victoria/Tasmania Branch</b> <b>BASIN-FORMING STRUCTURES and their relevance to hydrocarbon exploration in the Bass Basin</b></p>	<p>scientists G. Karner (Durham University) and B. Radke (CCOP/SOPAC, Fiji). Interpretation of the high-quality seismic data has led to the recognition of major Early Cretaceous extensional</p>	<p>hydrocarbon-prospective Eastern View Coal Measures (EVCM). Exploration of structures over the basin-marginal tilt-blocks has been unsuccessful, but hydrocarbon shows and indications are more widespread in the basin centre</p>
