

## **MARCH MEETINGS**

### **WA BRANCH (March 18th)**

#### **"GEOPHYSICAL EXPLORATION IN WESTERN AUSTRALIA: 1960'S vs NOW"**

**by Dr Bob Sheriff**

"The techniques of geophysics have changed since Dr. Sheriff's Western Australian work in the early 1960's, but many attitudes have changed even more. Dr. Sheriff will show selected slides of W.A. work during the 1961 to 1966 time period (including the first Vibroseis, thumper and offshore platform), tell some of his experiences, and discuss changing attitudes."
