

Spotlight On Fugro-Geoteam's Vessels

The latest two additions to Fugro-Geoteam's 3D seismic vessel fleet, Geo Celtic and Geo Caribbean in Bergen Norway this month.

Fugro-Geoteam has continued to invest in expanding their 3D seismic fleet during 2008 and now has one of the most modern 3D seismic fleets in the world. The new 'C Class' vessels are amongst the

most advanced seismic vessels available in the industry and have proven to be excellent platforms for a wide range of seismic surveys, including wide spread exploration surveys and 4D time lapse surveys.

Fugro-Geoteam currently has four seismic vessels in the Asia-Pacific region and the company's regional support office is based in West Perth. ■
